PLATFORM ORIENTED

PROS

- Loosely coupled services
- System easy to extend
- No single point of failure
- Services scalability
- Easy data analysis
- Big experience

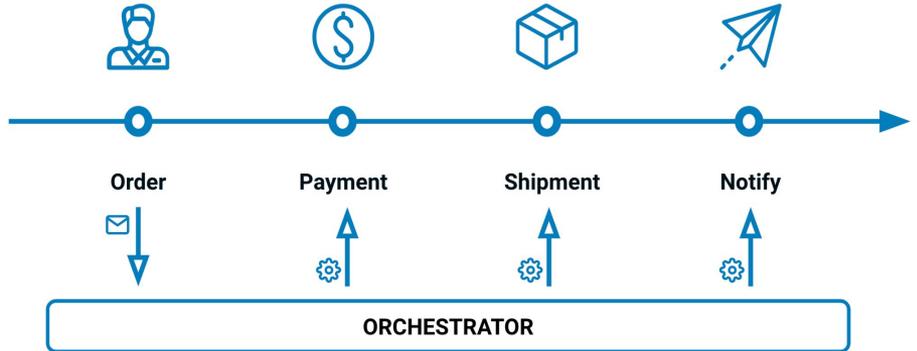

CONS

- No business transaction management
- Errors and retry are hard
- No priority between workflows
- Difficult to monitor
- No process documentation

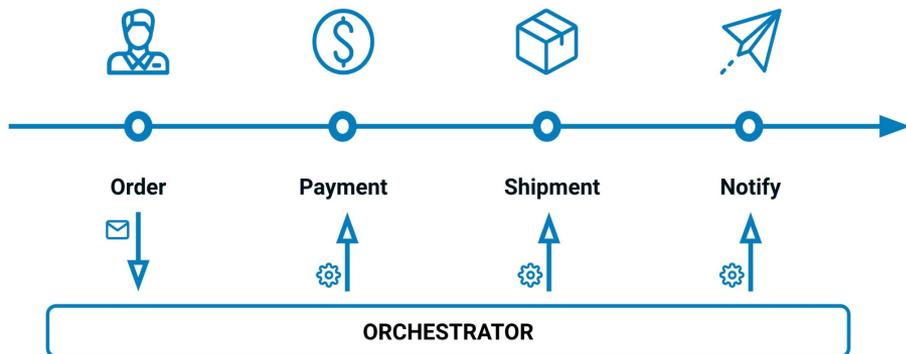

PROS

- **Monitoring**
- **Services keep their own logic**
- **Errors, retries and timeout are centralized**
- **Services still not coupled**
- **Transaction management**
- **Easy process analysis**
